LIST OF SUB-FUNDS

As part of the Fund the following Sub-Funds are available which pursue the following investment policy:

1) PPK inPZU 2025

The investment objective of the Sub-Fund is to increase the Value of the Sub-Fund's Assets as a result of an increase in the value of investments.

The Fund pursues the investment policy of the Sub-Fund as the so-called "defined date fund", i.e. a fund that changes its investment policy over time, striving to increase the investment safety of the Participants as it approaches the Defined Date. The defined date is approximately the year in which the Participant intends to withdraw in whole or in part the funds accumulated in the Sub-Fund in order to finance the costs of living after retirement.

The defined date for the Sub-Fund is 2025. The Sub-Fund is intended for persons born between 1963 and 1967. The Sub-Fund may be joined by a Participant born outside the age range indicated in the previous sentence.

The target allocation of the Sub-Fund's Assets to particular classes of assets with different risk levels is variable over time and will be performed subject to the principle of a gradual change of this allocation from instruments with the highest level of risk to a more conservative allocation associated with instruments with a lower risk level as the period of the Sub-Fund's operation approaches the Defined Date.

In the initial period of the Sub-Fund's operation the Debt Part will constitute not less than 50% and not more than 75% of the value of the Sub-Fund's Assets, while the Equity Part will represent not less than 25% and not more than 50% of the value of the Sub-Fund's Assets. In the next five years of the Sub-Fund's operation the Debt Part will represent not less than 70% and not more than 90% of the value of the Sub-Fund's Assets, while the Equity Part will constitute not less than 10% and not more than 30% of the value of the Sub-Fund's Assets. In the last phase, i.e. as from 2025, the Manager will not be able to invest in the Equity Part more than 15% of the value of the Sub-Fund's Assets, and the percentage of the Debt Part cannot be less than 85% of the value of the Sub-Fund's Assets.

The following chart shows a general pattern of changes in the target allocation of the Sub-Fund's assets to the debt part and the equity part during the operation of the Sub-Fund's operation until and after the defined date:

The investment objective of the Sub-Fund is to increase the Value of the Sub-Fund's Assets as a result of an increase in the value of investments.

The Fund pursues the investment policy of the Sub-Fund as the so-called "defined date fund", i.e. a fund that changes its investment policy over time, striving to increase the investment safety of the Participants as it approaches the Defined Date. The defined date is approximately the year in which the Participant intends to withdraw in whole or in part the funds accumulated in the Sub-Fund in order to finance the costs of living after retirement.

The defined date for the Sub-Fund is 2055. The Sub-Fund is intended for persons born between 1993 and 1997. The Sub-Fund may be joined by a Participant born outside the age range indicated in the previous sentence.

The target allocation of the Sub-Fund's Assets to particular classes of assets with different risk levels is variable over time and will be performed subject to the principle of a gradual change of this allocation from instruments with the highest level of risk to a more conservative allocation associated with instruments with a lower risk level as the period of the Sub-Fund's operation approaches the Defined Date.

In the initial period of the Sub-Fund's operation the Equity Part will constitute not less than 60% and not more than 80% of the value of the Sub-Fund's Assets, while the Debt Part will represent not less than 20% and not more than 40% of the value of the Sub-Fund's Assets. With the passage of the period of the Sub-Fund's operation the Debt Part will represent not less than 30% and not more than 90% of the value of the Sub-Fund's Assets, while the Equity Part will constitute not less than 10% and not more than 70% of the value of the Sub-Fund's Assets. In the last phase, i.e. as from 2055, the Manager will not be able to invest in the Equity Part more than 15% of the value of the Sub-Fund's Assets, and the percentage of the Debt Part cannot be less than 85% of the value of the Sub-Fund's Assets.

The following chart shows a general pattern of changes in the target allocation of the Sub-Fund's assets to the debt part and the equity part during the operation of the Sub-Fund's operation until and after the defined date:
